

## Description

Ship Game is a decentralized crypto game on the Binance Smart Chain network that allows both passive and active investors to rent virtual shipping containers and earn income from subletting.

To start the game and make a profit, you need to log into the game and buy a license for 0.025 BNB. After receiving the license, you will be able to rent containers and automatically sublet them for income.

## Rules & FAQ

1. The cost of a license to enter the game is 0.025 BNB;
2. You can register in the game through a partner (referral link) or without one;
3. You can only rent containers in succession. First the 1st, then the 2nd, then the 3rd, etc.
4. The cost of each subsequent container is more expensive than the previous one;
5. Each container can be sublet 3 times. Consequently, you can receive income from subletting 3 times. After that you can extend the rental period of your container;
6. You can extend the rental period of the container in advance, without waiting for the expiration of the rental period;
7. You can extend the lease of the container an infinite number of times and as a consequence, continue to receive income from subletting;
8. Receiving income from subletting is on a first-come, first-served basis. As soon as you rent a container, you are automatically in line to make a profit from subletting your container. Each time you receive rental income, your container will automatically be sublet again;
9. The distribution of income from subletting is automatic among the players. Each time you sublet, the container owner receives 74% of the cost of the container, and so three times, as long as the container is in your lease. 24% is the total referral bonus of the partner (referral), which is distributed according to the levels of referral program. 2% goes to support the team and marketing the project;
10. Income from subletting is automatically credited to your crypto wallet, which you used to authorize in the game.
11. The referral system allows you to build your own team in the game, receiving rewards from the rented containers of your team members.

## THE PROCEDURE FOR RECEIVING REMUNERATION

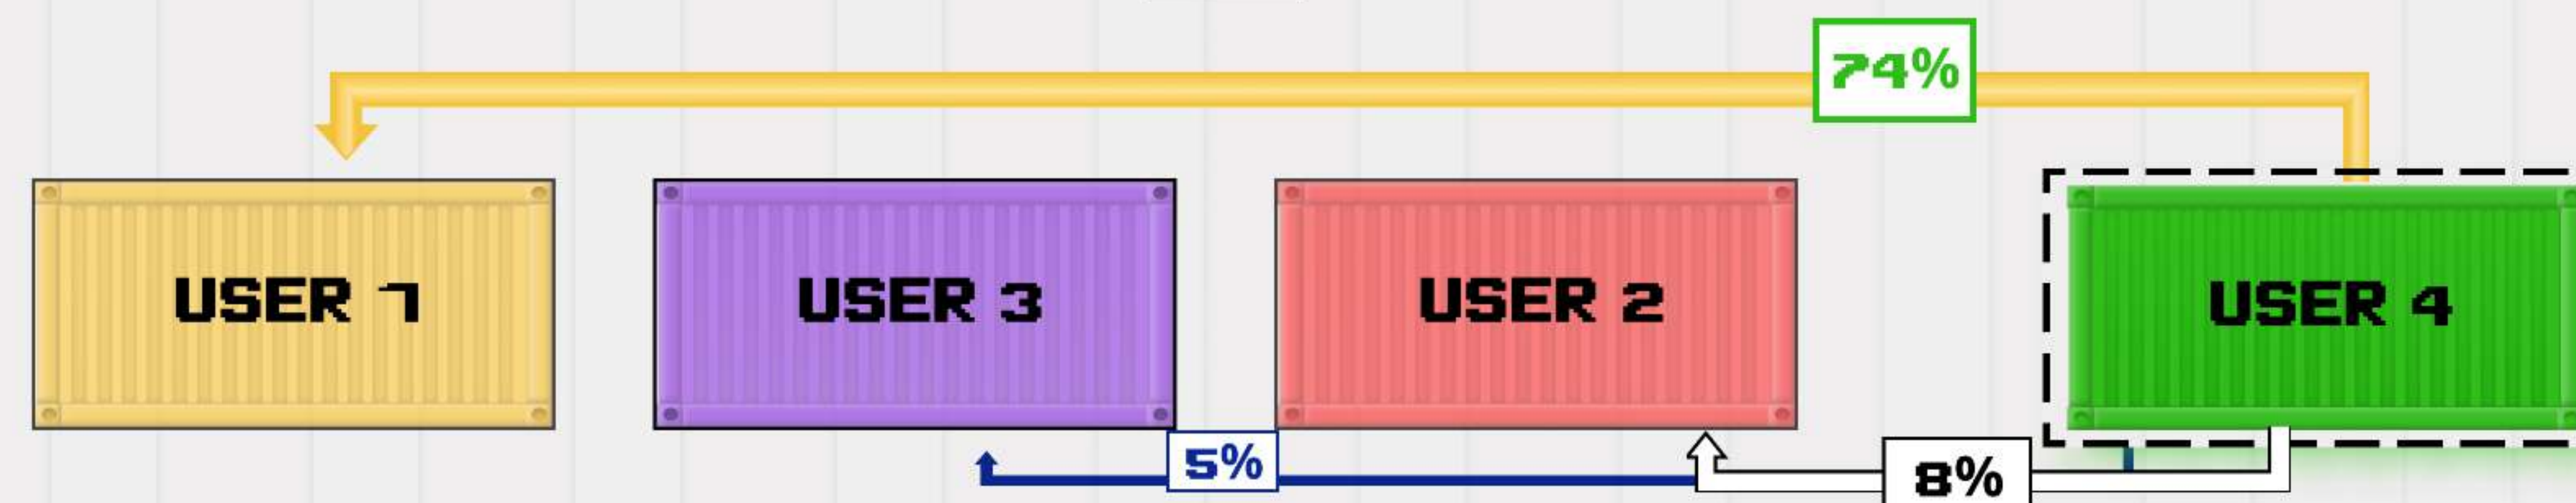

**STEP 1**

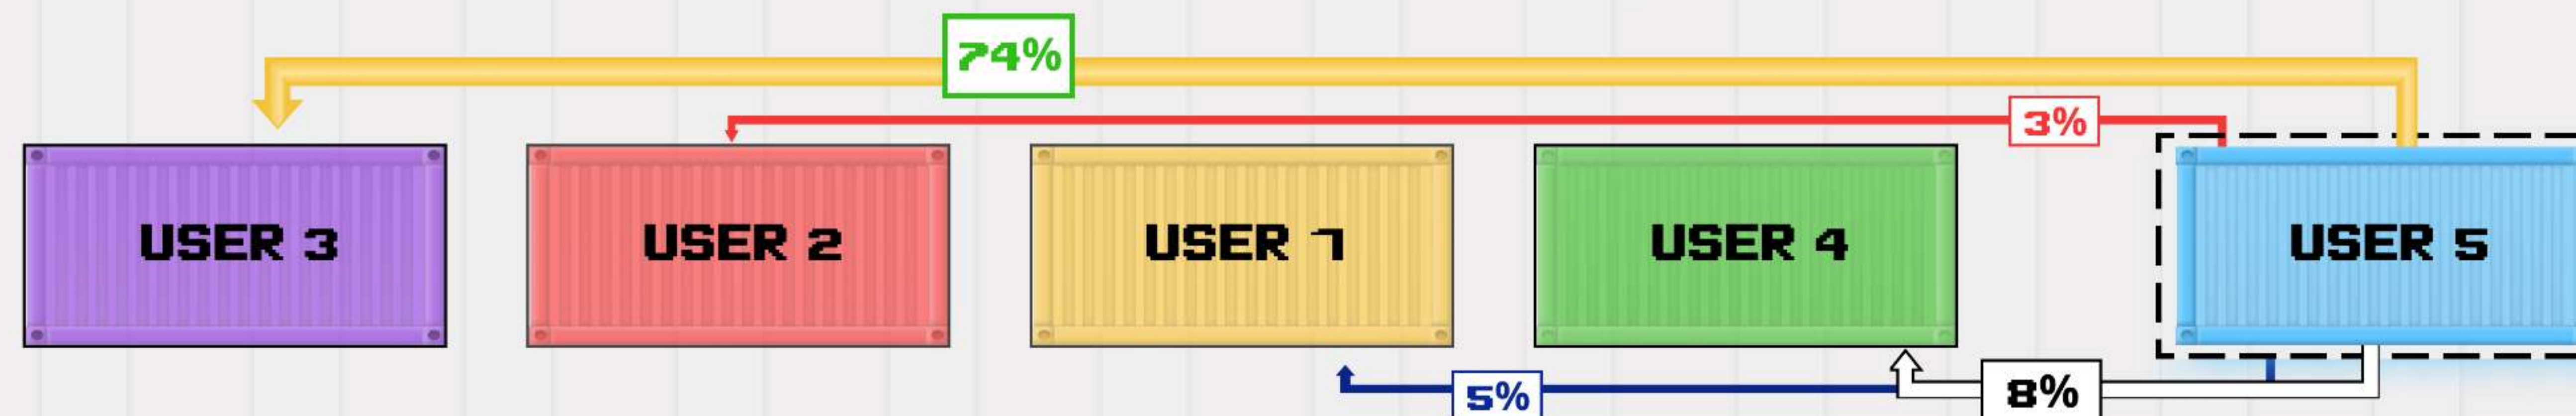

**STEP 2**

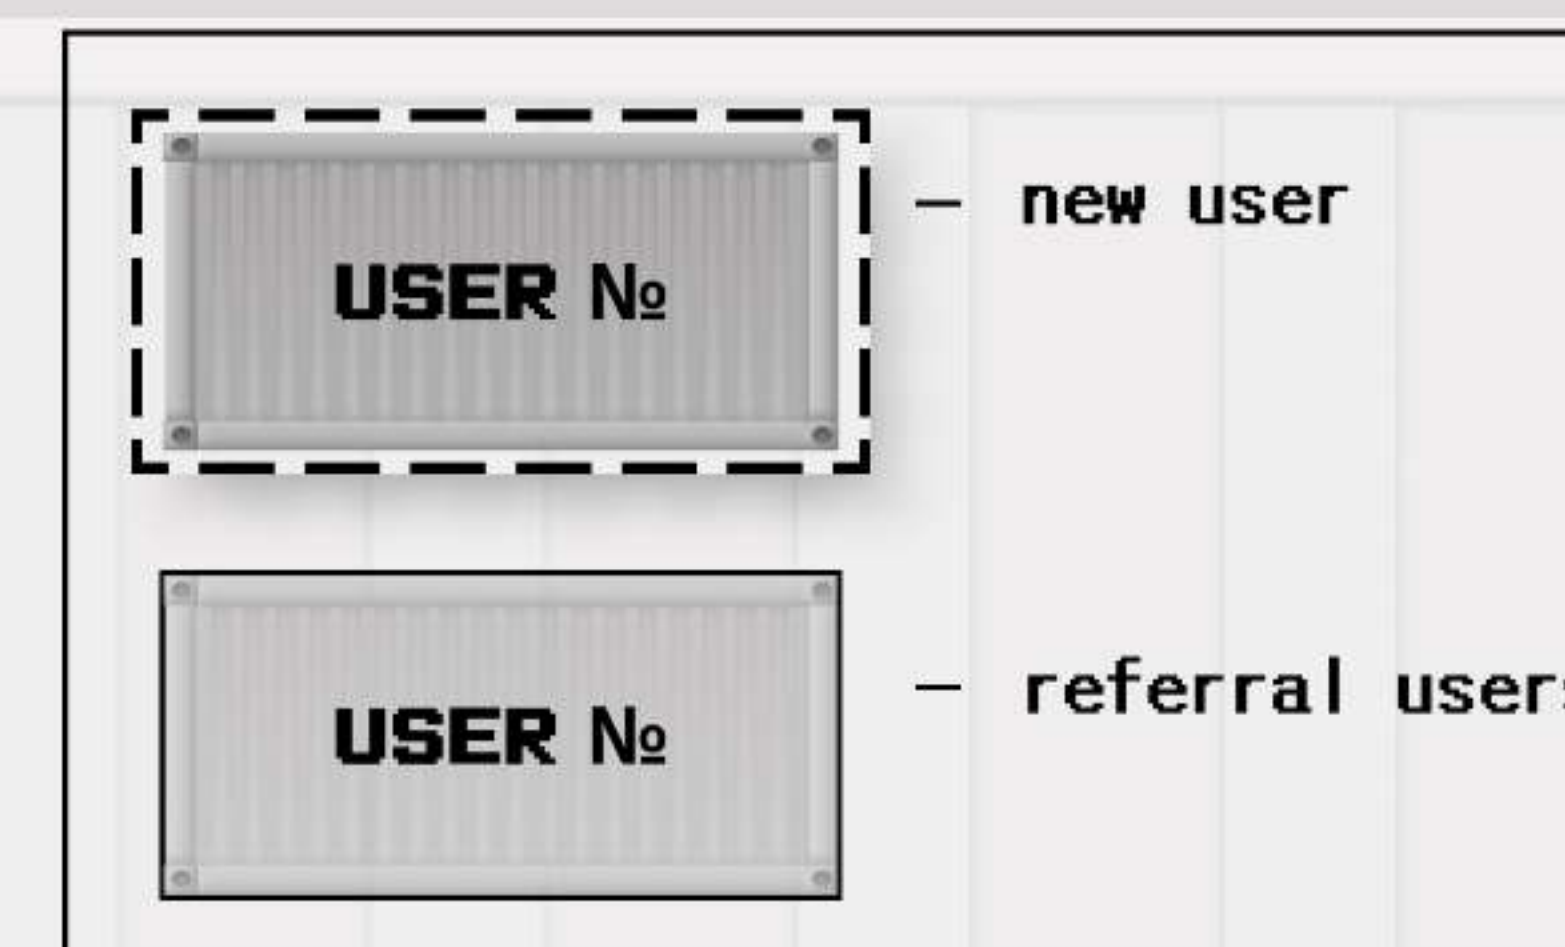

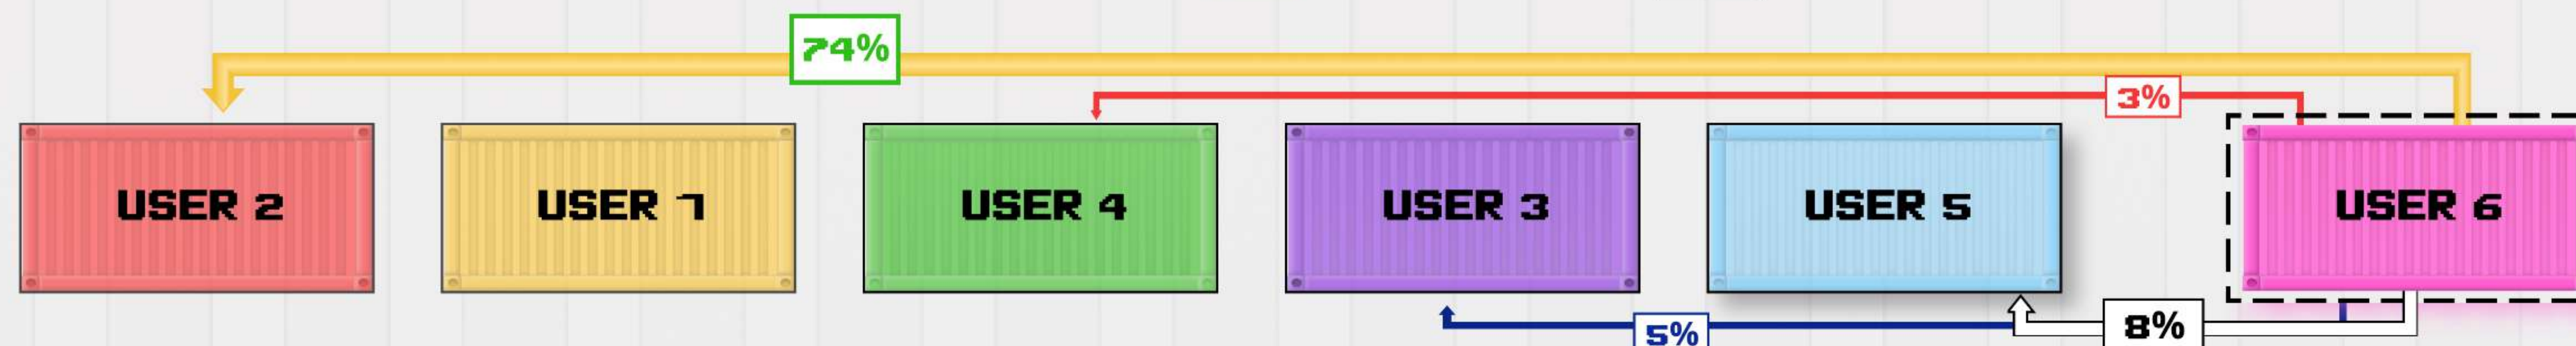

**STEP 3**

**STEP 4**

**STEP 5**

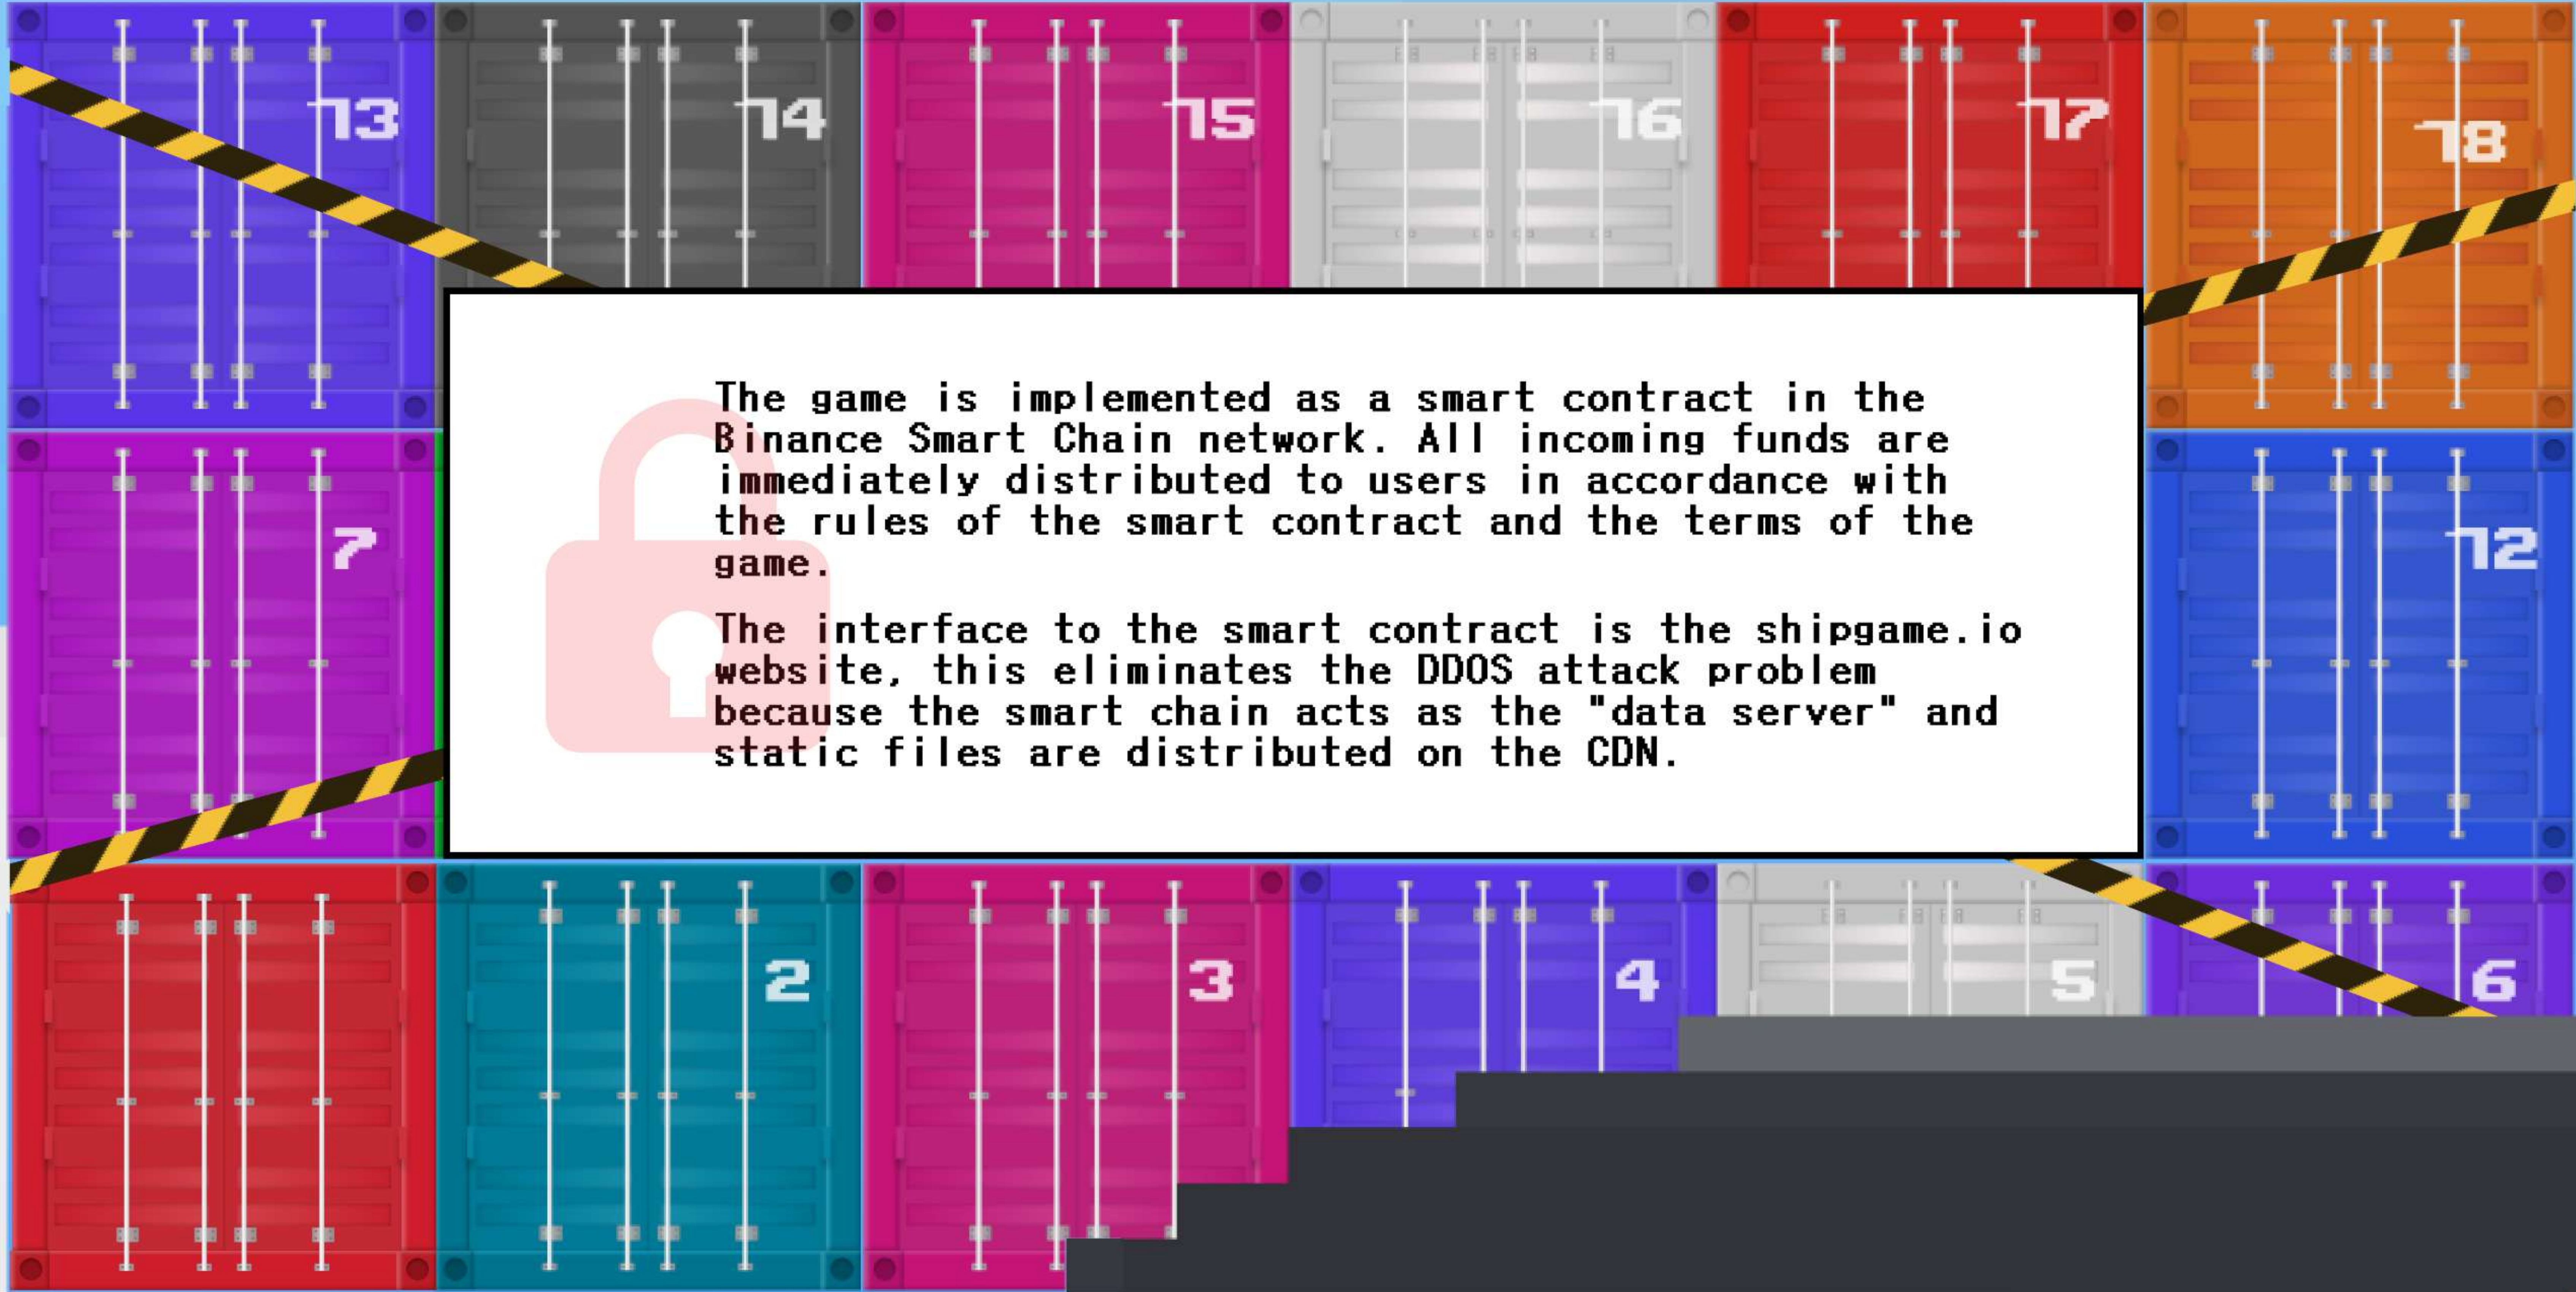

Referral levels and their rewards for renting containers:

- Level 1 - 8%
- Level 2 - 5%
- Level 3 - 3%
- Level 4 - 2%
- Level 5 - 1%
- Level 6 - 1%
- Level 7 - 1%
- Level 8 - 1%
- Level 9 - 1%
- Level 10 - 1%

## SECURITY

The game is implemented as a smart contract in the Binance Smart Chain network. All incoming funds are immediately distributed to users in accordance with the rules of the smart contract and the terms of the game.

The interface to the smart contract is the [shipgame.io](https://shipgame.io) website, this eliminates the DDOS attack problem because the smart chain acts as the "data server" and static files are distributed on the CDN.
